

Hang Time®

Biodegradable, Ready-to-Use Industrial Strength Foaming Cleaner

Hang Time can be used on all surfaces not harmed by water. It is a non-acid, sweet smelling formula that is user friendly and safe. It has a foaming agent that clings to vertical surfaces. Hang Time can also be used in foam guns to clean larger areas.

HOW TO:

Sinks and bathroom stalls:

Spray or squeeze onto surface, agitate with a wet rag or coarse sponge. Rinse or wipe off.

Toilets and urinals:

Spray or squeeze onto surface, agitate if needed. Swab with a bowl brush until clean.

Helpful Hint: Let the clinging foam work for a few seconds. Agitate if necessary and wipe off.

Hang Time can also be used in Kaivac cleaning machines.
