

Tile Time®

Cleans and removes food service grease, petroleum based soil, road salt and anything else that gets tracked onto quarry, ceramic and all other tile floor surfaces.

1 Before mopping, remove large debris; pick up sticky substances with a putty knife, then dust mop the entire floor.

2 Using a clean mop, buckets, and wringer; add 2 pumps per bucket.

3 After placing wet floor signs, immerse the mop in the solution. Lightly wring the mop then apply the solution liberally.

4 Wring out and dry mop the same section picking up any excess solution. Continue until the entire floor is mopped.

5 When finished, add 1 oz. of Tile Time to a bucket of hot water. Flush mop in the solution for 20 seconds, rinse and wring tightly.

6 Clean mop, bucket and wringer thoroughly. Rinse and hang mop.
